#### MenuItem Class

#### Attributes:

#### - name

```
(str) The name of the drink.
e.g. "latte"
```

#### - cost

```
(float) The price of the drink. e.g 1.5
```

#### - ingredients

```
(dictionary) The ingredients and amounts required to make the drink.
e.g. {"water": 100, "coffee": 16}
```

### Menu Class

#### Methods:

### - get items()

Returns all the names of the available menu items as a concatenated string. e.g. "latte/espresso/cappuccino"

## - find\_drink(order\_name)

Parameter order\_name: (str) The name of the drinks order.

Searches the menu for a particular drink by name. Returns a MenuItem object if it exists, otherwise returns None.

### CoffeeMaker Class

### Methods:

#### - report()

Prints a report of all resources.

e.g.

Water: 300ml Milk: 200ml Coffee: 100g

### is resource sufficient(drink)

Parameter drink: (MenuItem) The MenuItem object to make.

Returns True when the drink order can be made, False if ingredients are insufficient.
e.g.

True

### make\_coffee(order)

Parameter order: (MenuItem) The MenuItem object to make. Deducts the required ingredients from the resources.

# MoneyMachine Class

### Methods:

### - report()

Prints the current profit e.g.

Money: \$0

# - make\_payment(cost)

Parameter cost: (float) The cost of the drink.

Returns True when payment is accepted, or False if insufficient.
e.g. False
